| <p><i>These are scanned in sections and pieced together digitally or they are digitally photographed depending on the item.</i></p> | |

Notes:

Scans are done actual size at 300dpi for most work, and saved in .TIFF (lossless) format. This will allow them to be satisfactorily printed at their same original size.

Writing files to standard DVD media is included. If client wants the files written to archival gold DVD or CD media, that cost is \$4.00 per disc.

Printing is available at an extra charge; price depends on the paper chosen, and quantity of prints. See page two for standard printing prices on standard matte or glossy photo print paper.

Digital photo restoration is billed at \$30 per hour. I cannot give an estimate for digital photo restoration without seeing the actual photo.

STANDARD PHOTO PRINTING PRICE LIST

Standard photo printing is done on standard weight matte or semi-gloss photo paper with a 1/4 inch border all around the image.

| <u>SIZE</u> | <u>PRICE</u> |
|-------------|--------------|
| 3.5x5 | \$0.20 |
| 4x6 | \$0.20 |
| 5x7 | \$1.00 |
